

It's easy to take our sewer system for granted. It really is "out of sight and out of mind," but our wastewater disposal system is not as robust as we might assume.

# IT'S A TOILET!

Even items labeled "flushable" can clog pipes, tangle pumps and result in messy and costly sewer backups and repairs.

"Flushable" doesn't mean it will biodegrade or break down into tiny particles that won't cause problems.

**NOT A TRASH CAN!**

## THINGS YOU SHOULD NEVER FLUSH DOWN THE TOILET

Flushable Baby, Bathroom or Cleaning Wipes  
Feminine Hygiene Products  
Condoms

Cotton Balls & Swabs  
Prescription Medications  
Paper Towels  
Cigarette Butts

Band-Aids  
Dental Floss  
Fats, oil and grease  
Disposable diapers  
Facial tissues
